Hitachi 01 fault code. If there is a 01 fault code, your AC's protection system has tripped. This can happen due to a motor issue, drain problems, relay or PCB failure. Motor issues occur when motors are run for too long. This can cause the wiring to heat up, the insulation to melt, and result in a "short."

In 1969, under the Daikin brand, the first split-system appeared. The energy crisis also stimulated Daikin's development of air-conditioning technologies for large buildings. As a result, systems have appeared that have had variable refrigerant flow (VRV). At the beginning of this century, they were modernized so that the refrigerants in them did not threaten the ozone layer of the planet.
