The Social Construction Of Technological

Social construction of technology (also referred to as SCOT) is a theory within the field of science and technology studies. Advocates of SCOT—that is, social constructivists—argue that technology does not determine human action, but that rather, human action shapes technology. They also argue that the ways a technology is used cannot be understood without understanding how that technology is embedded in its social context.

Social construction of technology - Wikipedia

This pioneering book, first published in 1987, launched the new field of social studies of technology. It introduced a method of inquiry—social construction of technology, or SCOT—that became a key part of the wider discipline of science and technology studies.

The Social Construction of Technological Systems: New ...

The phrase the social construction of technology is used in at least two different, though overlapping, ways. Broadly it refers to a theory about how a variety of social factors and forces shape technological development, technological change, and the meanings associated with technology. More narrowly, the phrase refers to a specific account of the social construction of technology; the acronym SCOT is used to refer to this version of the broader theory (Pinch and Bijker 1987).
